**GAIN CONTROL OF YOUR TIME
WITH A GAP WALKSM CONSULTATION
AND ENGINEERING ANALYSIS**

REGAL®

WHY COMPLETE A GAP WALKSM CONSULTATION AND ENGINEERING ANALYSIS?

You are challenged to meet your daily production requirements while at the same time respond to corporate objectives. This is no simple task and you are not alone. Our efficiency experts have worked with many companies over the years to make the complex simple.

A Gap Walk consultation and engineering analysis is a defined 3 step process to help you gain control of your time:

STEP 1 LISTENING

It is critical we understand your key plant and corporate objectives and how you are being measured before we can help you.

STEP 2 PLANT WALK THROUGH

- Review areas of concern
- Identify nuisance maintenance issues
- Discovery of additional opportunities may occur based on our experience and knowledge of industry best practices

STEP 3 PRIORITIZING

Together we will identify project priorities so you get the biggest return on your time and money. Once we are in agreement and a timeline is established, your Regal representative will complete an application survey, and develop a proposal for implementation.

MEETING NOTES

STEP 1: LISTENING

Plant Priorities

Corporate Objectives

STEP 2: PLANT WALK THROUGH FINDINGS

STEP 3: PRIORITIZING

Once we are in agreement and a timeline is established, your Regal representative will complete an application survey, develop a proposal and manage the implementation based upon your approval as outlined on the next page.

NEXT STEPS

- ▶ APPLICATION SURVEY

APPLICATION CONSIDERATIONS

The proper selection and application of products and components, including the related area of product safety, is the responsibility of the customer. Operating and performance requirements and potential associated issues will vary appreciably depending upon the use and application of such products and components. The scope of the technical and application information included in this publication is necessarily limited. Unusual operating environments and conditions, lubrication requirements, loading supports, and other factors can materially affect the application and operating results of the products and components and the customer should carefully review its requirements. Any technical advice or review furnished by Regal Beloit America, Inc. and/or its affiliates ("Regal") with respect to the use of products and components is given in good faith and without charge, and Regal assumes no obligation or liability for the advice given, or results obtained, all such advice and review being given and accepted at customer's risk.
